12 June 1950

MEMORANDUM FOR: CSI/OPC

SUBJECT: Training Manuals

1. In developing the curriculum for the Advanced Specialized Training courses of the Training Division, it was felt that TTD should not in itself be responsible for the development of doctrine. Therefore a meeting was held with Mr. Buffington in February to arrange for the preparation of manuals which would logically include doctrine for each of the activities charged to OPC. It was agreed that TTD would submit to Staff III/PPD an outline of each of the manuals proposed by TTD. A copy of the memorandum with outlines is attached for your information.

2. At a second meeting it was determined that [redacted] would be the Training Division representative on this matter and that [redacted] would be the representative of Staff III/PPD. The target date established for completion was 1 June and it is understood that each of the planning branches with the exception of the Economic Warfare branch is fairly well along in such development.

3. It is my understanding that with the recent re-organization of OPC the program branches, or parts thereof, are retained under your jurisdiction. The Training Division is most anxious to have the above-described manuals made available to it for the development of the specialized courses in those activities. It is requested that you review this situation and that some time in the immediate future you and I and such other representatives as are desired get together to consider this problem and to work out its administration.

[redacted]
Chief, TTD
